## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of group VI in the reply filed on 2/7/08 is acknowledged. The elected species is a compound of table 1 where variable A is a1 and Z is structure h1.

### ***Claim Objections***

2. Claims 1-11 objected to because of the following informalities: non-elected subject matter is present within the claims. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. What is meant by the phrase "G3 as defined above"? Variable G3 is not redefined within claim 2. If applicant means that variable G3 is defined as it is in claim 1, it should be indicated as such. Because claims 3-11 depend on claim 2, they are rejected as well.

### ***Double Patenting***

5. Claims 4-11 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 3. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Claims 4-11 are each considered a substantial duplicate of claim 3 because an intended use for a composition carries no patentable weight, and therefore does not limit the claim from which it depends.

Art Unit: 1624

### ***Conclusion***

6. No claims are allowed.

7. The closest prior art of record is reported by Caulkett et al. (WO 99/57113, published November 11, 1999). Caulkett et al. teach example 2 (page 18) and compound 10 (page 27).

In each of these compounds, variable D is SO<sub>2</sub> and variable Z is a chloro-substituted benzofuran. These compounds do not anticipate or render obvious a compound of the elected species because variable G3 is NHR<sub>10</sub>, where variable R10 is a hydrogen atom, a C<sub>1-6</sub> alkylcarbonyl group, or a benzoyl group.

No mention of claim 1 in the office action. How can dependent claims get rejected 4-11 and the independent claim 1 is not.
